Discounts

If you take out a contract for two or three years, you are eligible for a discount of 10% and 25% respectively on the annual usage fees in the first contract year.

Explanation

For the first year, the number of users specified by you on commencement of the contract or, if this number is higher, the number of users registered in the application at the time of invoicing. The number of users included in the contract should be a reasonably accurate reflection of the actual number of users in the first year. The usage charges for the next year are based on the number of registered employees on the review date. The review date is the yearly anniversary date on which the contract was concluded.

Employees, out of service at the review date do not count as a user for the next contract year.

If the average number of users has been higher in the last contract year than the number of users counted at the present review date, the cost of the additional consumption over the last year will still be charged. When additional consumption is charged, the pricing scale of the previous contract year will apply.

EPOS BV reserves the right to annually raise prices shown with a maximum of 3%.
