

Covid-19 / Corona virus

Dear customer,

In order to continue to guarantee the continuity of our business operations in these uncertain times, we are currently working from home. Fortunately, our services are not location-dependent and that is why we can offer our services in the usual way.

Our hosting provider Denit in Amsterdam has also informed us that they also currently work and monitor from home. Denit has formed various teams for maintenance in the data centers. Cooperation may only take place within these teams in order to reduce the risk of mutual contamination as much as possible.

Let's hope that the Corona virus is quickly under control and that an infection can pass you and us.

We wish you strength to be able to carry out your business as well as possible during these difficult times.

Kind regards,

on behalf of EPOS BV,

Herman Jonker
manager
